

**Tamarack**  
HABILITATION TECHNOLOGIES, INC.

September 5, 2008

NEWS RELEASE

**John Lampe Named President of  
Tamarack Habilitation Technologies, Inc.**

Minneapolis, MN - John Lampe has been appointed President of Tamarack Habilitation Technologies, Inc. effective October 1, 2008. Mr. Lampe is a graduate of Carlton College in Northfield, Minnesota and a former Fulbright Scholar and Bosch Foundation Fellow, giving him the opportunity to live and study business and government for a period of two years in Europe. He has a law degree from the University of Minnesota and served as an Assistant Attorney General for the state of Minnesota. Over the past ten years, John has co-founded and worked with several start-up companies in the medical device and consumer products industries. Products John helped develop have been sold in a variety of retail outlets and featured in media such as USA Today and the New York Times. One of the products, a protective headband for soccer players, was a 2004 finalist at the International Trade Fair for Sports Equipment and Fashion in Munich, Germany. John holds seven United States patents and several foreign patents.

Marty Carlson, CPO, FAAOP, Tamarack's founder and past President, will focus on the science, technology and education functions of the company. He will continue as principal owner and board chairman. Mr. Carlson feels "...very fortunate to have found Mr. Lampe, someone whose experience and abilities so closely match what Tamarack needs to lead our expected growth into new products and new markets." Carlson noted that "The philosophy at Tamarack is that the physical challenges presented by neuromuscular conditions are part of a continuum. We all have physical limits and limitations. We all wish to be as functional and active as possible. Tamarack's mission '...to improve and maximize human physical performance.' is universal. For instance, the same friction management technology that helps heal and avoid foot wounds for people with Diabetes is helping elite athletes and weekend hikers avoid being stopped by painful blisters. Mr. Lampe's business priorities and philosophy are consistent with those that have guided Tamarack in its first 18 years of operation."

Tamarack Habilitation Technologies, Inc. is a product design & manufacturing company specializing in ankle-foot biomechanics and friction management technology. Manufacturer of the renowned 'Tamarack' Flexure Joint™, Tamarack has a short list of products distributed in the orthotic & prosthetic industry.
