NEWS RELEASE

Tamarack launches new ShearBan® Ovals product

Minneapolis, MN – Tamarack™ Habilitation Technologies announces the launch of its “ShearBan® Ovals”, the latest addition to the ShearBan® product line.

For over 15 years, Tamarack has been committed to the research, testing and development of low-friction technologies, including its ShearBan® and ENGO® product lines. ShearBan® offer long-lasting solutions in the clinical setting to friction-induced blisters, calluses and diabetic foot ulcers.

ShearBan® Ovals now provide a shape ideal for preventing and treating the diabetic foot. The Ovals are particularly suited for placement in footwear under the metatarsal heads, or next to the big toe - places where most ulcers develop. ShearBan® is effective, affordable, and easy to use for ulcer prevention & relief.

ShearBan® Ovals are now available from Becker Orthopedic Appliance Co. For purchasing information, call (800) 521-2192 toll-free, or visit BeckerOrthopedic.com. For general product inquiries, visit ShearBan.com.

Tamarack™ Habilitation Technologies, Inc. is a product design & manufacturing company in Minneapolis, MN specializing in ankle-foot biomechanics and friction management technology. Manufacturer of the renowned Tamarack Flexure Joint™, Tamarack has a short list of products distributed in the orthotic/prosthetic, podiatry and consumer markets.
